- 4.) Summary of Improvements/Mitigation Conducted during 2022

In 2022, all portable buildings were caulked and painted, sealing any cracks in the buildings. We also relocated our garbage and recycle cans away from the portables. We had limited pesticide applications or mitigation in 2022. We had a few reports of ants in the buildings, which was resolved with cleaning and removal of food sources. We also had 2 pesticide applications in regards to landscaping and weed control, on April 15th and one on December 16th. Information on the pesticides used can be found at the links below:
